Yosef Sabag - Full Stack Developer

054-618-7549   yosefisabag@gmail.com   **Portfolio**   **GitHub**   **Linkedin**

Summary

Software developer with hands-on experience in **TypeScript**, **JavaScript**, **React**, **Node.js**, **SQL**, **NoSQL** (**MongoDB**), **Python-Flask**, and UI-UX. Built and maintained full-stack web applications, worked on both **front-end** and **back-end** development, including AI-based solutions. Strong **problem-solving** skills, clean coding practices, and adaptability in fast-paced environments. Seeking a junior full-stack developer role to build **scalable, high-quality applications** in the real world.

Experience

Predicto AI - Full Stack - R&D Operations Assistant   2025 - Present

- Designed and implemented a frontend QA automation framework using **Jest** and **React Testing Library** executed manual QA across multiple releases
- **Developed and maintained frontend features**, resolving bugs and improving performance
- Authored and maintained API documentation to streamline cross-team collaboration
- Coordinated tasks and workflows in Monday.com to support **agile development** cycles

Wotch Health - Full Stack - Internship   2025

- Developed end-to-end features, enhancing developer workflow, and implementing Storybook unit tests.
- Built automation infrastructure using WebSockets for seamless real-time communication using Playwright.
- Independently managed tasks using Jira and Git within an Agile team environment.
- Delivered tasks under tight deadlines.

Projects

Course Platform - (Udemy Clone)

- Developed a full-stack online course platform replicating Udemy's core features using **React.js**, **Tailwind**, **Express.js** (with user authentication), global state management with **Redux**, **TypeScript**, **MongoDB**, and **Socket.IO**.
- Built the backend with **Node.js**, implementing email verification (**Nodemailer**), dynamic course management, and real-time interactions.
- **MUI**, and **ShadCN** for a responsive, component-based UI-UX, integrated **Faker** for mock data, and **Selenium** (**Python**) for automated testing.
- Used Postman for **RESTful API** testing and validation, gaining hands-on experience in scalable architecture and full-cycle delivery.

Tim Trailers - (Movie Website)

- Created an interactive movie trailer platform with a custom character, "Tim," to enhance user engagement.
- Implemented search, filtering, pagination, and smooth animations using **vanilla JavaScript**.
- Fetched and rendered dynamic content from the TMDb **REST APIs** with a focus on responsive, user-friendly design.
- Prioritized seamless UI-UX through intuitive layout and performance optimization.
