Yosef Hayim
Full Stack Developer

054-618-7549 • yosefisabag@gmail.com • **Linkedin** • **GitHub**

Profile

Full-stack web developer with **expertise** in JavaScript, and frameworks such as React, Node.js, MongoDB and Express (MERN). Recognized **leader** and **outstanding** soldier in the IDF, bringing resilience, dedication, and problem-solving skills. **Passionate** about collaborative environments and crafting impactful, real-world tech solutions. A self-learner with an autodidactic mindset and a love for investigating complex problems, I am eager to join a full-stack role to drive meaningful innovation.

Experience

- **Wotch Health Startup - Full Stack - Internship**   **2025 - Active**
  Built a real-time debugging tool for production, expanded E2E coverage with Playwright, and enhanced clinician-facing views with external data integrations using EJS. Worked across backend and frontend to ship stable features in a fast-moving healthcare startup, while gaining hands-on experience with SQL, cloud environments, and production systems.

Education

- **Fullstack Web Development Bootcamp - IITC College**   **2024 - 2025**

  Completed an **intensive 796-hour bootcamp** program Full-Stack web development with HTML, CSS, JavaScript, React, Node.js, Express, and databases such as MongoDB and NoSQL.

- **High School Diploma - Full Bagrut Certificate - Peres Campus**   **2018**

  Completed a high-tech-oriented program with a focus on technology and innovation.

Skills & Technologies

- **Programming Languages:** JavaScript, Python, Typescript , HTML , CSS
- **Frameworks & Libraries:** Tailwind , React.js, Node.js, Express.js, Mongoose, Ejs, Playwright, Docker, Socket.io, Redux , Zhustand, Storybook
- **Databases:** MongoDB, SQL, SQLite, PostgreSQL
- **Skills**: Jira, Git & Version Control, Postman , Responsive Web Design, Problem-Solving, Collaboration, Adaptability, Communication Skills

Military service

Infantry Commander - IDF - 931st Battalion - Negevist   **2018-2021**
Served as a combat **Negevist** and completed training as an **outstanding soldier** in the Nahal Brigade recruitment cycle. Recognized for **excellence** in training and **leadership** during the IDF Commanders' Course, where I developed strong leadership and **problem-solving skills**. Gained skills in **team management**, communication under pressure, and tactical planning that are transferable to fast-paced tech environments.

Projects

- **Tim Trailers - Visit Tim!**
  Developed an interactive movie trailer platform featuring Tim, an iconic popcorn character, showcasing creativity and engagement. Built with HTML, CSS, and vanilla JavaScript for dynamic functionality and responsive design.

- **Udemy clone** - **visit Udemy!**
  Built a full-featured course platform from scratch, replicating Udemy's core experience. Developed the frontend with React + Vite and the backend using Node.js with TypeScript. Implemented JWT-based authentication, PayPal integration, role-based access control, and secure user/session management. Designed modular APIs, seeded realistic data using Faker, and managed stateful components across a complex UI.

Languanges

- **Hebrew**: Native
- **English**: Proficient
